

Superstore Sales Performance Dashboard

Key Business Insights | 2011–2014

Executive Overview

- Sales increased consistently across 2011–2014, indicating overall business growth.
- Technology generated the highest sales among the major categories.
- West was the strongest region by profit.
- Overall profit margin remained around 12–13%, indicating relatively stable profitability.

Product Performance

- Copiers generated the highest profit among categories.
- Tables was identified as a loss-making category and requires profitability investigation.
- Canon imageCLASS was the highest-selling product in the Top 5 analysis.
- Average discount was approximately 15.6%, highlighting the need to monitor discount impact on profitability.

Customer & Regional Analysis

- Consumer was the largest customer segment, contributing more than 50% of total sales.
- California was the strongest-performing state by sales, followed by New York.
- West recorded the strongest sales performance, while South was comparatively weaker.
- The customer base contained 793 customers, with approximately 6 orders per customer on average.

Business Recommendations

- Review Tables by analyzing pricing, supplier costs, and discount levels.
- Prioritize Technology and Copiers for inventory, marketing, and promotion decisions.
- Investigate low-performing products for repricing, bundling, promotion, or discontinuation.
- Protect strong markets such as West and California while investigating weaker regions.
- Review the approximately 15.6% average discount rate to determine whether discounts create incremental sales or reduce margins.
